Microhydrin® Plus™

longevity · detox · defense*

Key Benefits:

- Supports longevity*
- Powerful daily detoxification*
- Broad-spectrum antioxidant protection*
- Energy, Endurance & Recovery (Microhydrin)*

What is it?

Microhydrin Plus is the most effective broad-spectrum antioxidant available. It combines the powerful antioxidant – Microhydrin® – with eight other potent antioxidants to give you the ultimate protection from free radical damage.*

What is it formulated to do?

Antioxidants are compounds that stop free radicals from damaging your cells. Stopping this damage is the key to keeping your cells healthy so you can enjoy an active, vibrant life. Microhydrin Plus is formulated to help you slow the aging process and support your immunity with research-backed, broad-spectrum antioxidant protection.*

Who may benefit?

This unique and powerful antioxidant is an essential product for everyone living in this modern world. Today our bodies face more free radical damage than ever before, so we need a powerful product to protect our health. Anyone facing a health concern may notice particular benefits.

How is it used?

Microhydrin Plus is a daily essential for optimum health. Two capsules daily confer much needed protection while 4 capsules a day is ideal.

A New Defense Against Free Radicals

We have demonstrated through laboratory research that Microhydrin provides more electrons and more hydrogen than any other product on the market...and millions have experienced the profound effect this has had on their health, energy and endurance.*

Meanwhile, research in the field of antioxidants has grown at an incredible rate. New antioxidants have been discovered, and research shows that we need a number of them for optimum protection against the many different types of free radicals that threaten our health. That is why our Founder, Clinton Howard, set out to create the most powerful broad-spectrum antioxidant. He did exactly that with the development of Microhydrin Plus, a research-backed antioxidant that offers unparalleled protection from a wide range of cellular assaults.

Why This Defense Is Critical To Your Health

Free radicals are unstable compounds that have lost electrons in the process of oxidation, during normal body functions,

Holistic Health Refined with Research

True to our heritage, we provide solutions that sustain and advance natural health and wellness. We combine the best of nature with responsible, smart science to deliver exclusive products with effective results.

RBC Life leads natural wellness with 25 years of research experience. We understand and improve the strength of nature so we can deliver it to you.

and have been consumed from oxidized compounds in food, water and air. Free radicals increase in the body during stress and exercise. They damage our health as they steal electrons from vital cells, interfering with the cells' ability to function normally. They cause oxidative stress to the body and may contribute to:

- Increased aging of bones, organs, brain and skin
- Interference with cell replication
- Cellular and DNA damage
- Enzyme malfunction
- Vascular and respiratory weakness
- Age-related conditions

Our only defense against free radicals are antioxidants. Consuming a variety of antioxidants can stave off many of the degenerative conditions thought to be caused by free radicals.

The Antioxidants in Microhydrin Plus

Microhydrin is the most potent source of free radical fighting electrons available today.* It has been shown to neutralize the most dangerous free radicals, increase hydration, reduce lactic acid build-up in the muscles, and help establish pH balance.*

Microhydrin Plus contains the following additional antioxidants:

- Alpha Lipoic Acid – protects the heart and vascular system, aids in liver detoxification, protects from damage caused by high blood sugar.*
- N-Acetyl-L-Cysteine – helps break up mucus in the lungs, plays a protective role in the liver, helps protect the kidneys and cardiovascular system.*
- Green Tea Extract – helps prevent the oxidation of LDL cholesterol, supports the immune system, protects cells from oxidative damage.*
- Milk Thistle Extract – may raise glutathione levels, which helps the liver to detoxify harmful industrial chemicals, drugs and alcohol.
- Ascorbic Acid (vitamin C) – enhances white blood cell function, interferon production and antibody immune response.*
- Niacinamide – a non-flush form of niacin; promotes a healthy digestive system, youthful skin, increased energy, and a healthy cardiovascular system.*
- Selenium – supports the cardiovascular system, keeps the skin supple, important for prostate health.
- Quercitin – is an antioxidant bioflavonoid that protects pancreatic beta cells, beneficially affects many enzymes.*

All of these antioxidants have been well-researched for their numerous health benefits. You could spend a fortune trying to take each of these products individually, but they have been added to Microhydrin in effective amounts.
