

Live Healthy!

COLO-VADA PLUS[®]

14-Day Total Body Cleanse

Item #1193

Directions:

The Colo-Vada system is conveniently pre-packaged for easy and hassle-free cleansing.

- Phase 1 packets are taken for 7 days.
- Phase 2 packets & Colo-Vada pouches are taken for 4 days.
- Phase 3 packets are taken for 3 days.

Please see second page for ingredients panel

Key Benefits:

- Helps cleanse internal residue & toxins*
- Improves regularity*
- Revitalizes overall health*

What is it?

The Colo-Vada Plus is a highly effective 14-day total-body cleanse system. This best-selling product has helped millions of people detox and cleanse their bodies and regain their health.*

Why we need to cleanse

Everyday our bodies accumulate pollutants and waste material that must be eliminated to remain healthy. Many health professionals now believe that almost all health concerns begin with a toxic colon. Just as we take out our garbage on a regular basis, we must learn to cleanse our bodies to fully regain health and vitality.*

Our bodies are constantly detoxifying and attempting to eliminate waste material. The function of the colon is to rid our system of unusable food products and environmental contaminants, along with dead cells and other metabolic waste. This toxic mixture accumulates in the colon, and it must be eliminated quickly and completely. If the body is unable to rid itself of these pollutants, free-radical production increases and all systems of the body may be harmed. However, through cleansing, the colon can begin to restore itself to proper functioning.*

Phase one: seven days

During this preparation phase, two daily packets of nutrients and herbs are taken to activate the detoxification and elimination processes.*

Phase two: four days

This phase is designed to eliminate accumulated toxic waste and parasites. Convenient packets of powder are mixed with juice or water four times a day. This powder acts like a sponge as it expands in the system, absorbing toxins and material from the intestinal wall. The waste can then pass easily and safely from the body. This phase is most effective if you consume only the powder drinks and supplements provided. Drink water, unsweetened juices and herbal teas. Avoiding solid food as much as possible allows the powder mixture to loosen material without interference. The powder will expand and you should not feel hungry. Steamed vegetables can be eaten if desired.*

Phase three: three days

The final phase will reintroduce solid food. Digestive enzymes are provided to re-establish the health of your digestive system.*
